RE: CAS - Cleaning Advanced Systems Inc.

To Whom It May Concern:

McCoy - Rockford Inc. has been partners in business with Cleaning Advanced Systems Inc. for the last 21 years. Our business partnership has included cleaning all our facilities here in the Houston area. We have continued our partnership because of the quality of service that has been provided by Rudy Pleytez of his cleaning team. Advance Cleaning Systems Inc. takes care of our day-to-day facility cleaning needs while providing additional special services upon request (i.e. like maintaining our multiple different types of flooring within our facilities & warehouse floor cleaning services our day porter & power washing exterior of the building and sidewalks). As you can tell there is no job too big or too small that Advanced Cleaning Services Inc. would not be willing to do for your company upon request.

If they are selected as your chosen service provider, you can expect that if there is some type of concern or problem within your facilities they will advise you so that you can make appropriate arrangements. They provide honest hard-working services at a reasonable price for cleaning services in the City of Houston. This is an extra benefit and truly an asset to a facilities manager for not only budgetary purposes as well as keeping the facilities maintenance costs down.

I would like to personally recommend Advance Cleaning Systems Inc to your company. They are trustworthy hard-working individuals who have consistently proven themselves when it comes to taking care of all our cleaning needs here at McCoy - Rockford Inc. There are a lot of companies competing for cleaning businesses. I think you will find Advance Cleaning Systems Inc will make the best and an excellent long-term business partner for your company.

Please feel free to contact me if you have any questions or concerns. I would like to invite you to come by McCoy - Rockford Inc. and tour the facility. If you would like, you are welcome.

Kind regards,

Sheryl Lancaster
Fleet & Facilities Manager
